### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Claims 1-18 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. The prior art (US Patent # 6,282,194) relates to transit trunk subnetwork system which is configured to expand the existing capacity for bearer traffic in telephone networks. The prior art of record (US Patent # 6,195,714) relates to a method and apparatus for transferring data associated with synchronous transfer mode (STM) calls through an asynchronous transfer mode (ATM) network. The apparatus includes a voice interface control unit, a signaling interface and a TDM peripheral device associated with each edge node in the ATM network.

As to claims 1-7 and 13-14, the prior art of record does not teach wherein in response to receiving a control message from the computing module to route a call to a desired trunk member, the interface is further adapted to map the desired trunk member to a connection set up through the backbone network. As to claims 8-10, and 15-18, the prior art of record does not teach wherein in response to receiving a control

message from the computing module to route a call to a desired trunk member, the interface is further adapted to map the desired trunk member to a connection set up through the backbone network. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
